

Hanan Aldayel

Computer Science Graduate | Aspiring Software Engineer | UI/UX Enthusiast
Hanan.aldayel1@gmail.com | +966 0509689249 | Riyadh, Saudi Arabia

Motivated Computer Science graduate with hands-on experience in software development, UI/UX design, data analytics, and cybersecurity. Demonstrated leadership and innovation through award-winning projects.

Eager to contribute to impactful tech solutions in a growth-driven environment.

Work Experience

Network Engineering Intern – Nokia, Riyadh (July – August 2024)

- Completed a 6-week intensive training program focused on practical and technical aspects of networking.
- Gained knowledge in FTTX, IPv4/IPv6, 5G fundamentals, network infrastructure, protocols, and cybersecurity.
- Participated in lab visits and telecom tower inspections for hands-on experience.
- Delivered weekly technical presentations, enhanced soft skills, and worked in collaborative teams.
- Led a final project titled “Self-Driving Network” using automation and AI to optimize network performance.
- Awarded 1st Place among all groups and honored with an Excellence Award in a formal ceremony.

Web Development Bootcamp – Tuwaiq Academy, Riyadh (October – December 2025)

- Enrolled in an intensive Full-Stack Web Development bootcamp using Python and Django.
- Gaining practical experience in Python programming, OOP, exception handling, and debugging.
- Building and testing web applications using HTML, CSS, and Django frameworks.
- Applying database management, CRUD operations, and ORM techniques to ensure data accuracy.
- Developing skills in problem-solving, code review, and quality assurance through individual and group projects.

Core Skills

- **Programming Languages:** Python, JavaScript, Swift, SQL.
- **Full-Stack Development:** Skilled in designing, building, and testing both front-end and back-end applications using HTML, CSS, Python, and Django.
- **Cybersecurity:** Familiar with Kali Linux and basic penetration testing techniques.
- **Development Tools:** Figma, Android Studio, VS Code.
- **Data & Productivity Tools:** Microsoft Office Suite (Word, Excel, Power BI).
- **Interpersonal:** Excellent communication and teamwork skills.

Education

- Bachelor of Computer Science - Shaqra University, Graduation: 1 June 2025

Certifications & Courses

- **Develop in Swift** – Apple (Feb 2023 – May 2023)
- **Cloud Computing** – AWS (Jan 2024 – Mar 2024)
- **Programming in Python** – Cisco (Nov 2022)
- **Cybersecurity Basics** – Cisco (Jan 2023)
- **Database Design & SQL** – Oracle (Dec 2023)
- **Sensors & Sensor Circuit Design** – Coursera (Mar 2024 – Apr 2024)
- **Data Analytics with Power BI & Excel** – IBM (Oct 2024 – Dec 2024)
- **AI Concepts & Advanced Applications** – SDAIA (Sep 2025)
- **Fundamentals of Artificial Intelligence** – SDAIA (Sep 2025)

Projects & Achievements

Palm Guard – Graduation Project:

- Led a team to build a smart IoT-AI system for early detection of palm tree diseases.
- Developed mobile and web applications using Python, Android Studio, and Firebase.
- Integrated sensors for real-time soil analysis (humidity, pressure, temperature).
- Won 1st Place at university level for innovation and technical execution.

Nokia Training Final Project – Self-Driving Network:

- Used automation & AI for network enhancement.
- Won 1st Place and received Excellence Award from senior officials.

AwareNow – Security Awareness & Phishing Simulation Platform:

- Developed a phishing simulation platform to assess and improve user security awareness.
- Enabled tracking of user behavior to identify potential security risks.
